Hebrew - Native | English – High level

Avraham Kuperwasser- Frontend Developer

Summary

Frontend developer with development experience in React framework with management capabilities, a people's person, can work independently and within teams. Provide fast solutions and strategies, high personal capabilities, initiative-taking, and adaptive learner. I have proven high team management skills and led complex processes in my previous roles.

I wish to progress and focus on Front-end development in my career.

Skills

- **Frontend:** HTML5, Scss, JavaScript (ES6), React, Redux, (familiar with Angular and Vue).
- **Backend:** NodeJS (REST API, Express), MongoDB, Python basic knowledge.
- **OS:** Linux, Windows
- **Software:** VS Code, PyCharm, Git.

Professional Experience:

12/2021 – Karev foundation – guiding children in elementary schools at programming (scratch), robotics(Lego), and 3D printers in this capacity.

10/2021- I participated as a lead Frontend developer, which was part of a team in the development competition of the **#coola_like** community, whose goal was to create a management system for a community of job seekers.

My part in the team included the following issues:

Planning and designing the system

Creating the Home component

Creating the Profile component, including registration and login.

Task-page management page closely working with the backend team and testing the data from the API.

<https://avraham186.github.io/coola-like/>

The product should be released in the next few months.

08-12/2020- content development at Hackeru Solutions – writing content and presentations for Cyber-security students.

01-08/2020 – Technical support at Partner – Solving customer's issues with the network (routers and range extenders), TV converter, and converter RC, understand the problem and solve it or schedule a technician visit if solving was not possible during the call.

Education

- **Course graduate, Coding Academy Israel. (2021-2021)**- intensive coding bootcamp (640 hours)- Check out my graduation project (inspired by Airbnb). In this project, I functioned in a team of three developers. <https://avraham-bnbfy.herokuapp.com/>
- **Ethical-Hacker** course graduate, Hackeru college (2018-2020)

Military Service

2008-2011 - soldier in the Combat Engineering Corps
